UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the May/June 2010 question paper

for the guidance of teachers

9706 ACCOUNTING

9706/22 Paper 22 (Structured Questions (Core)), maximum raw mark 90

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

(b) (i) 1 Wear and tear
2 Obsolescence
3 Time
4 Depletion
No marks for methods. Any three correct for (3) **[3]**

(ii) 1 Machinery, vehicles
2 Computers, any technological equipment
3 Lease
4 Quarry, oil well etc.
Any three correct for (3) **[3]**

(c) 1 Cost or Market value
2 Useful life
3 Residual value at end of useful life
4 Expected length of ownership
5 Rate of usage
6 Method of depreciation
7 Type of asset
8 Machine hours
Any correct 4 for (4) **[4]**

3 (a) (i) The break-even point is the level of activity at which the business makes neither a profit nor a loss – i.e. total contribution = total fixed costs. (accept a relevant formula) [2]

(ii) The margin of safety is the distance between the break-even point and the expected level of activity. It is the amount by which actual activity can fall short of expected activity before a loss is incurred. [2]
[4]

DATA

Sales	460 000
Variable costs	299 000
Fixed costs	90 000

(b) $\frac{\text{Sales - variable costs}}{\text{Sales}} \times 100$ **1**

$\frac{460 - 299}{460} \times 100$ **1 1**

35% **1of** **[4]**

(c) $\frac{\text{Fixed costs}}{\text{c/s ratio}} \times 100$ **1**

$90\,000 \times \frac{100}{35}$ **1of**

$257\,143 **1of** **[3]**

(d) $(\text{Fixed costs} + \text{profit}) \times \frac{100}{\text{c/s ratio}}$ **1 1**

$(90\,000 + 100\,000) \times \frac{100}{35}$ **1of**

$542\,857 **1of** **[4]**

(e) Sales × c/s ratio - fixed costs **1 1of 1**

$(375\,000 \times \frac{35}{100}) - 90\,000$

$41250 **1of** **[4]**

OR $375\,000 - (.65 \times 375\,000 + 90\,000)$ **1 1of 1**

$41250 **1of**

© UCLES 2010

(f) Revised contribution = sales - 5% - variable costs

460 000 - 23 000 - 299 000 $138 000

1 **1** **1** **1of**

$$\text{Revised c/s ratio} = \frac{\text{revised contribution}}{\text{new sales}} \times 100$$

1of

$$\frac{\$138\,000 \times 100}{460\,000 \times 0.95}$$

1 **1**

31.57895%

$$\text{Fixed costs} + \text{profit} \times \frac{100}{\text{c/s ratio}}$$

$$= (\overset{\mathbf{1}}{90\,000} + \overset{\mathbf{1}}{80\,000}) \times \frac{100}{31.57895}$$

1of

$538 333

1of

Accept answers between $531 250 and $548 387 – answer depends on number of decimal places revised c/s ratio is taken to. **[11]**

ALTERNATIVE METHODS ACCEPTABLE THROUGHOUT
