Cambridge International General Certificate of Secondary Education

CAMBRIDGE INTERNATIONAL MATHEMATICS **0607/61**

Paper 6 (Extended) **May/June 2018**

MARK SCHEME

Maximum Mark: 40

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2018 series for most Cambridge IGCSE™, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

IGCSE™ is a registered trademark.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

MARK SCHEME NOTES

The following notes are intended to aid interpretation of mark schemes in general, but individual mark schemes may include marks awarded for specific reasons outside the scope of these notes.

Types of mark

M Method marks, awarded for a valid method applied to the problem.

A Accuracy mark, awarded for a correct answer or intermediate step correctly obtained. For accuracy marks to be given, the associated Method mark must be earned or implied.

B Mark for a correct result or statement independent of Method marks.

When a part of a question has two or more 'method' steps, the M marks are in principle independent unless the scheme specifically says otherwise; and similarly where there are several B marks allocated. The notation '**dep**' is used to indicate that a particular M or B mark is dependent on an earlier mark in the scheme.

Abbreviations

awrt	answers which round to
cao	correct answer only
dep	dependent
FT	follow through after error
isw	ignore subsequent working
nfww	not from wrong working
oe	or equivalent
rot	rounded or truncated
SC	Special Case
soi	seen or implied

Question	Answer	Marks	Partial Marks
A	**INVESTIGATION LARGEST PRODUCTS**		
1(a)(i)	1 7 8 7 2 6 8 12 3 5 8 15 4 4 8 16 4 × 4	**1**	
1(a)(ii)	100 10 × 10	**1**	
1(b)(i)	1 8 9 8 2 7 9 14 3 6 9 18 4 5 9 20 4 × 5 or 5 × 4	**1**	
1(b)(ii)	110 10 11	**1**	
2(a)	10 4 5 5 5	**1**	
2(b)	Valid explanation	**1**	
2(c)	2916 nfww	**2**	**B1** for 2 3 3 3 2 3 3 3 nfww If 0 scored, **SC1** for correct product of *their* bottom row of 2s and 3s **C** opportunity
3(a)	2 + 2 + 2 = 3 + 3 [= 6] oe	**1**	
3(b)	2 × 2 × 2 [8] < 3 × 3 [9] oe	**1**	
3(c)(i)	972	**1**	
3(c)(ii)	$2^2 \times 3^5$	**1**	
4(a)(i)	[N =] $2x + 3y$	**1**	**C** opportunity
4(a)(ii)	No more sets of three 2s to change when $x < 3$ oe	**1**	
4(b)(i)	3 486 784 401	**2**	**B1** for $x = 0$, $y = 20$ soi or $3^4 \times 2^{24} = 3^4 \times 3^{16}$ oe seen **C** opportunity

Question	Answer	Marks	Partial Marks
4(b)(ii)	6 973 568 802	**1**	**FT** *their* **(b)(i)** × 2 **C** opportunity
4(c)	43 nfww	**2**	**B1** for $[2^2] \times 3^{13}$ or $[4] \times 3^{13}$ soi or $\log_3 1\,594\,323$ oe or $x = 2$, $y = 13$ soi **C** opportunity
Communication: Seen in two of the following questions		**1**	
2(c)	Showing how *their* 2916 was calculated e.g. $3^6 \times 2^2$ or $3 \times 3 \times 3 \times 3 \times 3 \times 3 \times 2 \times 2$		
4(a)(i)	N = an expression in x and/or y		
4(b)(i)	$3y = 60$ or $N = [0] + 3(20)$ or $60 = [0] + 3(20)$ oe		
4(b)(ii)	Solution to $2x + 3y = 62$ shown by $x = 1$, $y = 20$ or $2 + 3 \times 20 = 62$ or $2 + 60 = 62$ or $N = 2 + 60$ oe		
4(c)	6 377 292 ÷ 4 or $\frac{\log 1594323}{\log 3}$ or $\log_3 1\,594\,323$ or 6 377 292 ÷ 3 repeatedly reducing to 4 oe or correct method for prime factorisation of 6 377 292		

Question	Answer	Marks	Partial Marks
B	**MODELLING COUNTING PRIME NUMBERS**		
5(a)	2, 3, 5, 7, 11, 13, 17, 19	**1**	
5(b)	15 nfww	**1**	**C** opportunity
5(c)	24 nfww	**1**	**C** opportunity
6	Table completed Correct points plotted	**1**	**FT** *their* table
7(a)	$L(x) = 0.22x + 3.2$ oe	**2**	**M1** for 0.22 or $\frac{34-12}{140-40}$ oe soi or for correctly setting up and solving a pair of simultaneous equations to find 0.22 or 3.2 **C** opportunity
7(b)	223	**1**	**FT** *their* $y = mx + c$ with *their* m between 0 and 1 and *their* $c \neq 0$ **C** opportunity
8(a)	[0].4	**2**	**M1** for $140k - 0.001(140^2) = 34$ or better **C** opportunity
8(b)	There are more primes but the graph or function value decreases oe	**1**	
9(a)(i)	77	**1**	Condone 76
9(a)(ii)	138	**1**	Condone 137 If 0 scored in **(a)(i)** and **(a)(ii)** then **SC1** for 76.8[6…] or 76.9 in **(a)(i)** and 137.7[8…] or 137.8 in **(a)(ii)**
9(b)	33 30	**1**	**STRICT FT** For 33, **FT** *their* **(a)(i)** – 44 provided integers For 30, **FT** *their* **(a)(ii)** – *their* **(a)(i)** – 31 provided integers **C** opportunity
9(c)(i)	0.125 oe	**2**	**B1** for 1250
9(c)(ii)	$\frac{1}{2\log x}$ or $\frac{1}{\log x^2}$	**1**	**C** opportunity

Question	Answer	Marks	Partial Marks
9(d)	547	**2**	**M1** $\frac{x}{2\log x} = 100$ soi **C** opportunity
Communication: Seen in five of the following questions		**2**	**1** for communication seen in three questions
5(b)	41, 43, 47 indicated		
5(c)	97 indicated		
7(a)	Substitution of (40, 12) or (140, 34) in $y =$ *their* $0.22x + k$ or $y - b =$ *their* $0.22(x - a)$ oe or method for finding the second unknown if using simultaneous equations		
7(b)	Substitution of 1000 seen		
8(a)	Correct intermediate step after initial substitution		
9(b)	Relevant subtraction seen		
9(c)(ii)	Correct unsimplified form		
9(d)	Sketch of a pair of relevant graphs seen or three improving trial and improvement steps
